Cloud Services and Software Hosting

Servers are a crucial part of any business's computer network, often loaded with unique, custom software and programs, and holding sensitive and critical data that a business needs in order to operate smoothly. More businesses than ever before are now looking to Data Centers (DCs) to host their servers due to a very high level of security and other overwhelming benefits they provide. So why not let us host your software for you?

Rapid Implementation

We provide fast turnaround for server setup and configuration which allows you to start using your purchased software sooner.

Reliable Cost Forecasting

Our hosting services are charged at a monthly (per user) rate which means there are no surprises and you can confidently forecast your IT costs over extended periods of time.

Ease of Access

All you need is Internet access making it easy for staff to access the service from anywhere and from a variety of devices.

High level of Support

We provide all users with a high level of support to ensure that they enjoy a hassle free connection at all times.

Increased Reliability

All of our servers are housed in a Tier 3 Datacenter offering you full system and database redundancy, load balancing, fail-over and high bandwidth connectivity providing better availability and performance for all applications.

Increased Security

Our Data Centre provides physical & data security ensuring that you can operate with confidence. Regular backups mean should something go wrong, we can reinstate your data quickly and easily.

Technology Enhancements

Regular Server and Database upgrades are managed by us freeing you from the hassle of testing, managing change or converting data.

Reduced Risk

Because we fully manage your hosted application, you avoid having to spend money on costly I.T. equipment and the employment of highly trained I.T. staff allowing you the freedom to change as your business requirements do.

Setup & Implementation:

We will setup and configure your Hosted Solution for all nominated users. We will also provide users with necessary logins & shortcuts and Customise the system to suit your business needs. We can also import existing data during the setup process to minimise data entry. If you are already using our software, we can quickly and easily migrate all of your data and user settings across to our secure server.

Updates & Support:

Customers using our Hosted Solution have priority access to all product updates and enhancements to ensure you are always using the most up to date version available. We offer Phone, Email and online support for all users. Our online support allows us to connect to you quickly and securely meaning we see what you see without using 3rd party applications. Phone Support hours between 9.00am and 4.00pm EST

Fees:

Software Hosting:

\$55 per month for each concurrent user

Dedicated Windows Server:

Contact us for a price (dependent on number of users & software licences required etc)
